April 27, 2021

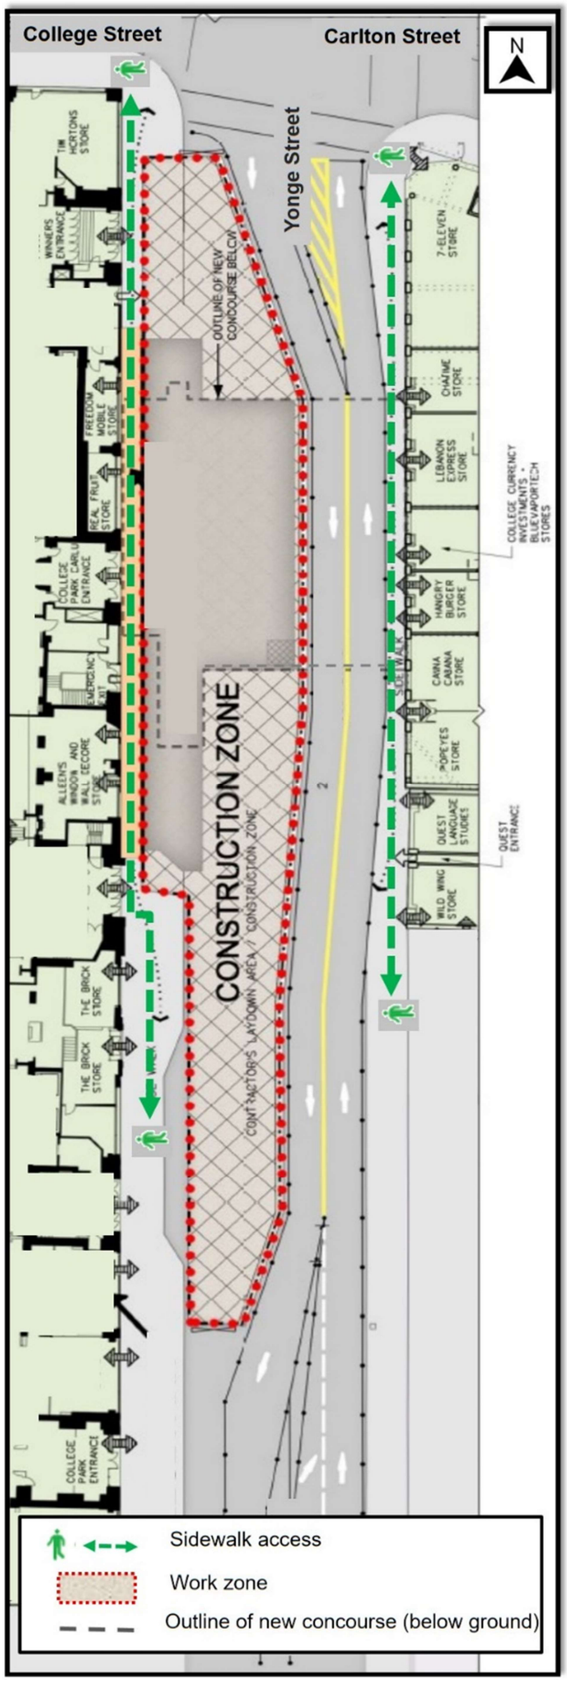
College Station – Stage 2
Second Exit/Entrance & Easier Access Project

Timeline: As early as May 3, 2021
*Content / timeline accurate at time of printing

What to expect

Starting as early as May 3, 2021, Stage 2 of the Second Exit/Entrance and Easier Access construction for College station will begin.

This stage involves the start of heavy construction in the area in order to carry out the structural foundation work for the new elevators and concourse for College Station. The expected duration of this stage of construction is approximately 1 year.



Work activities will include:

- Installation of hoarding/barriers and traffic control measures.
- Removals of street furniture, bike racks, trees and lighting will be removed the week of May 3. Access to the sidewalk will be maintained during this work.
- Following the removals, the sidewalk will be narrowed to 1.8m to accommodate a safe work zone.
- Structural foundation work will start with the installation of caisson piles. This is an alternative drilling method that produces significantly less noise than traditional pile driving.
- Excavation of the future elevator and concourse site.
- Heavy construction vehicles, equipment and site staff will be present in the general area.
- Noise, dust and vibration associated with construction can be expected with this work. Efforts will be made to keep levels to a minimum.

Vehicular & Pedestrian Access:

- Lanes of traffic on Yonge Street will be shifted to the east side of the street.
- One lane of traffic in each direction will be maintained at all times.
- Sidewalks and access to local businesses will be maintained on both sides of Yonge Street.
